# **SITUATION SUMMARY**

## **Cal OES Activation Status**

<b>State Operations Center</b>	<b>Inland Region EOC</b>	<b>Coastal Region EOC</b>	<b>Southern Region EOC</b>
<b>Normal Operations</b>	<b>Normal Operations</b>	<b>Normal Operations</b>	<b>Normal Operations</b>

### **Outlook Web Access (Webmail), Cal OES HQ**

On 02/04/18, the Cal OES Internet Technology Duty Officer (ITDO) advised that issues have been identified when logging onto the Outlook Web Access (OWA Webmail) system. Cloud servers have been identified as the source. As a result, some configurations have been modified to bypass the workload and sharing process. Cal OES IT is working with Microsoft to restore the servers to normal operations.

### **Cal OES COASTAL REGION**

- Nothing significant to report.

### **Cal OES INLAND REGION**

- Nothing significant to report.

### **Cal OES SOUTHERN REGION**

- Nothing significant to report.

### **2018 January Winter Storm – Mud and Debris Flow**

### Service Interruptions:

- None reported.

# WEATHER OF CONCERN

## Weather of Concern

- A dense fog advisory is in effect for San Diego County Coastal Areas including the cities of Carlsbad, Encinitas, Chula Vista, National City, and San Diego until 0900 hours.

## **Active Weather Warnings, Watches and Advisories by County:**

- <https://alerts-v2.weather.gov/counties/CA>

# **WEATHER SYNOPSIS BY REGION**

## **NORTHERN CALIFORNIA**

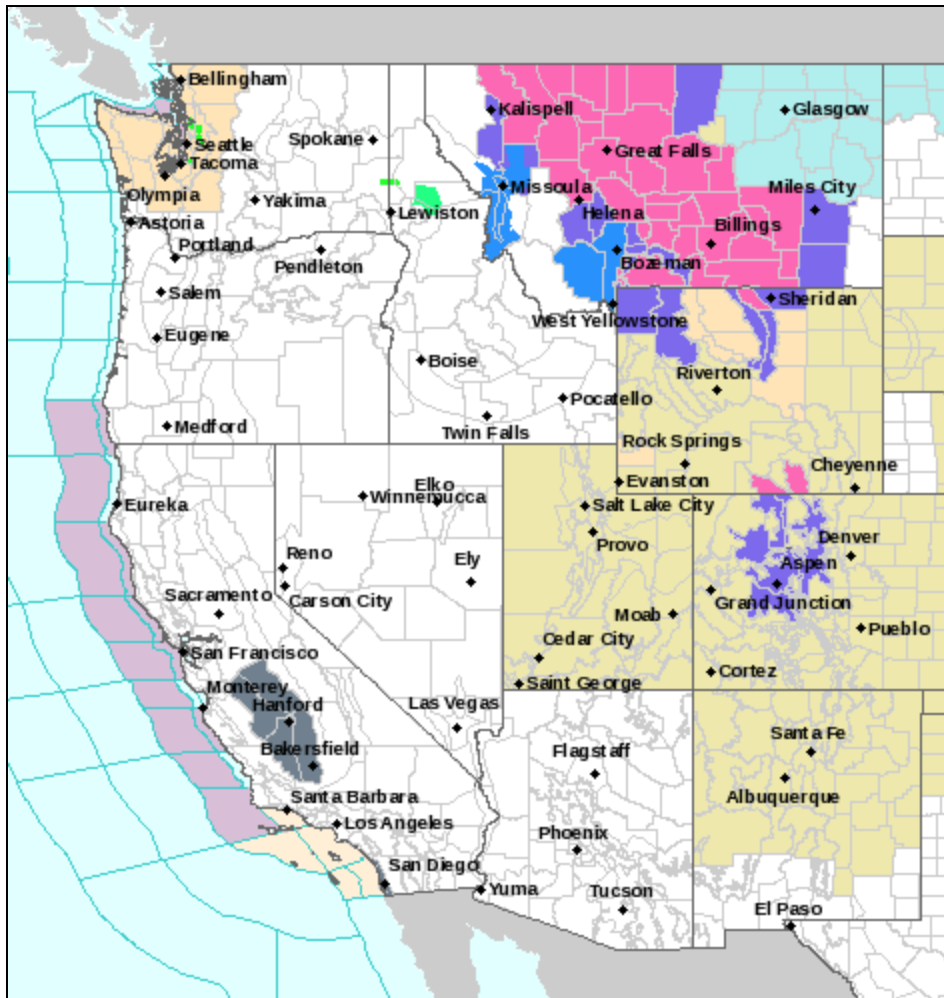

A blocking ridge remains in place over the eastern Pacific keeping the storm track well to the north of the region. A short-wave will drop south into the Great Basin into Tuesday. This will cool temperatures slightly compared to the past weekend, but daytime highs will still be well above average. Breezy north winds will increase through the Central Valley into mid-week, and as conditions continue dry out, valley fog will be very limited the next several mornings. Temperatures trend back up several degrees beginning Wednesday as ridging re-strengthens over the area.

## **SOUTHERN CALIFORNIA**

High pressure aloft off the California coast will continue fair dry weather through Friday with above average temperatures. A shallow marine layer and weak coastal eddy will bring areas of low clouds and dense fog near the coast early this morning with the low clouds and lowest visibilities a little farther inland for tonight into Tuesday morning. Weak offshore flow will bring periods of gusty northeast to east winds near the coastal foothills and below passes and canyons for Wednesday into Thursday. Onshore flow will return and strengthen for Friday through next weekend with coastal cooling spreading inland and with more night and morning coastal low clouds and fog.
